Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claims 10, 30, 40, 41** are rejected under 35 U.S.C. 102(e) as being anticipated by Wilhelmsson et al. (EP 1 343 285 A1) (hereafter Wilhelmsson).

Regarding claim 10, Wilhelmsson discloses all claimed subject matter “determining a decision boundary for a respective channelization code using the received symbols and at least one decision boundary estimate determined for another channelization code” in para. 2, 6-8, 58-66).

Regarding claim 40, see claim 10 above.

Regarding claim 30, Wilhelmsson further discloses “self bit value estimates” in para. 61.

Regarding claim 41, see claim 30.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2611

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 31-34** are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilhelmsson in view of Bottomley et al. (WO 01/01594 A) (hereafter Bottomley).

Regarding claim 31, see claim 10 above. Wilhelmsson differs from the claimed invention in that Wilhelmsson does not teach "updating the decision boundary ... a history of the variable $d_{\Sigma}^{(n)}$ ". However, Bottomley discloses that such claimed subject matter is known in the art in page 19, lines 11-29. Thus, it would have been obvious to one skilled in the art at the time of the invention to incorporate such teaching from Bottomley into Wilhelmsson to obtain a statistics over a long interval so as to provide a more accurate estimate.

Regarding claims 32-34, these claimed subject matter would have been obvious based on the aforementioned combination.

Allowable Subject Matter

5. Claims 1-9 are allowed.

6. Claims 11-29, 35-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Jeong (US 6,907,084) discloses Method And Apparatus For Processing Modulation Symbols For Soft Input Decoders.

Dorney et al. (US 6,789,225) discloses Bit Error Position Estimation In Data Decoder.

Malm et al. (US 204/0264591 A1) discloses Method And System For M-QAM Detection In Communication Systems.

Wang (US 2004/0258173 A1) discloses M-Ary Phase Shift Keying (PSK) Bit-Boundary Turbo Coded System.
